

RESEARCH AND SERVICES IN AN INTELLECTUAL PROPERTY AREA

We perform patent analyses crucial for the overall innovation process: from the invention idea to its successful commercialisation. As an interdisciplinary group of experts, we support clients in an effective intellectual property management. We also provide technology development monitoring along with competitor and potential partner analysis. Ultimately, our goal is to enable better R&D development planning and proper decision-making in organisations.

WE OFFER :

REPORTS:

- examination of the state of the art, patentability and patent clearance;
- examination of the scope of patent protection and patent family;
- technology landscape in a given technology field;
- analysis of technology development over time in a given technology field;
- examination of patent activity of companies;
- comparative analysis of entities in terms of innovation.

SERVICES:

- conducting a patent or utility model application process with further monitoring and evaluation;
- representing clients before the Patent Office;
- monitoring patent legal status;
- competition monitoring and analysis including links between entities;
- assessing the value and costs of a patent portfolio maintenance;
- identification of potential licensees.

VALUE :

- relevant input to grant or subsidy applications;
- solutions to technical problems in R&D work;
- potential and risks associated with commercialisation of products and technologies;
- support in patent protection decisions and suggestions for changes to the patent portfolio;
- ranking of key players in the field of invention;
- identification of competitors, partners and relationship between them in the IP field;
- support in R&D strategy development.

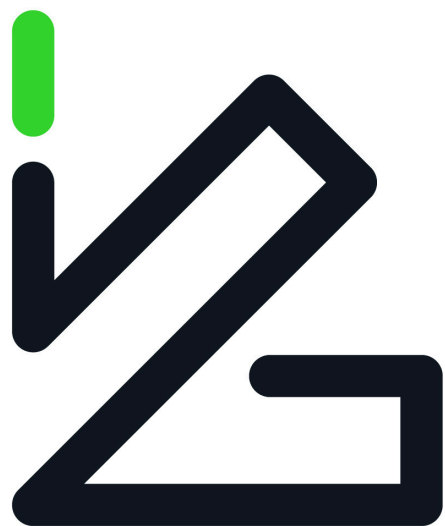

STRENGTHS :

- a team of patent attorneys collaborating with Lukasiewicz's technologists;
- online access to 187 million patent documents from 170 patent offices;
- professional AI platform for patent analysis and IP insight;
- graphical presentation of data and comprehensible conclusions;
- industry-specific technological awareness;
- past cooperation with public and private sector entities and NGOs.

OUR CLIENTS :

- intellectual property management departments;
- commercialisation and business development departments;
- R&D departments or units;
- entities obtaining funding for projects;
- start-ups or independent inventors.
